HCPLY CO LTD

# ABOUT US

VIETNAM PLYWOOD HCPLY CO., LTD (HCPLY) is a leading Vietnam Plywood Manufacturer & Supplier, trusted by global partners for consistent quality and reliable service.

We specialize in interior plywood, commercial plywood, packing plywood, construction plywood, and core veneer. With diverse face options like Bintangor, Okoume, Gurjan, Birch, Poplar, Pine and core choices including Eucalyptus, Acacia, and lightweight full white core, HCPLY delivers tailored solutions to meet international standards.

Backed by one main factory and 10+ affiliated mills, we export over 1,000 containers annually to Asia, the Middle East, Europe, and Latin America.

HCPLY CO LTD

# VISION

01

To become the most trusted Vietnam Plywood Manufacturer & Supplier for global markets.

---

02

To provide sustainable plywood and veneer solutions that meet international standards of quality, reliability, and consistency.

---

03

To build long-term partnerships worldwide, delivering value through innovation, competitive pricing, and responsible practices.

HCPLY CO LTD

# MISSION

## 01

To produce and supply high-quality plywood and veneer that meet international standards of thickness, moisture, durability, and surface quality.

## 02

To provide flexible specifications and customized solutions for interior, commercial, packing, and construction plywood, as well as core veneer.

## 03

To ensure competitive pricing and reliable delivery, helping clients achieve sustainable growth in their markets.

## 04

To build long-term partnerships worldwide, based on trust, consistency, and shared success.

# All products

Formaldehyde Emission	E0/E1/CARB P2 compliant
Applications	Furniture, cabinets, wardrobes, interior decoration, general commercial use

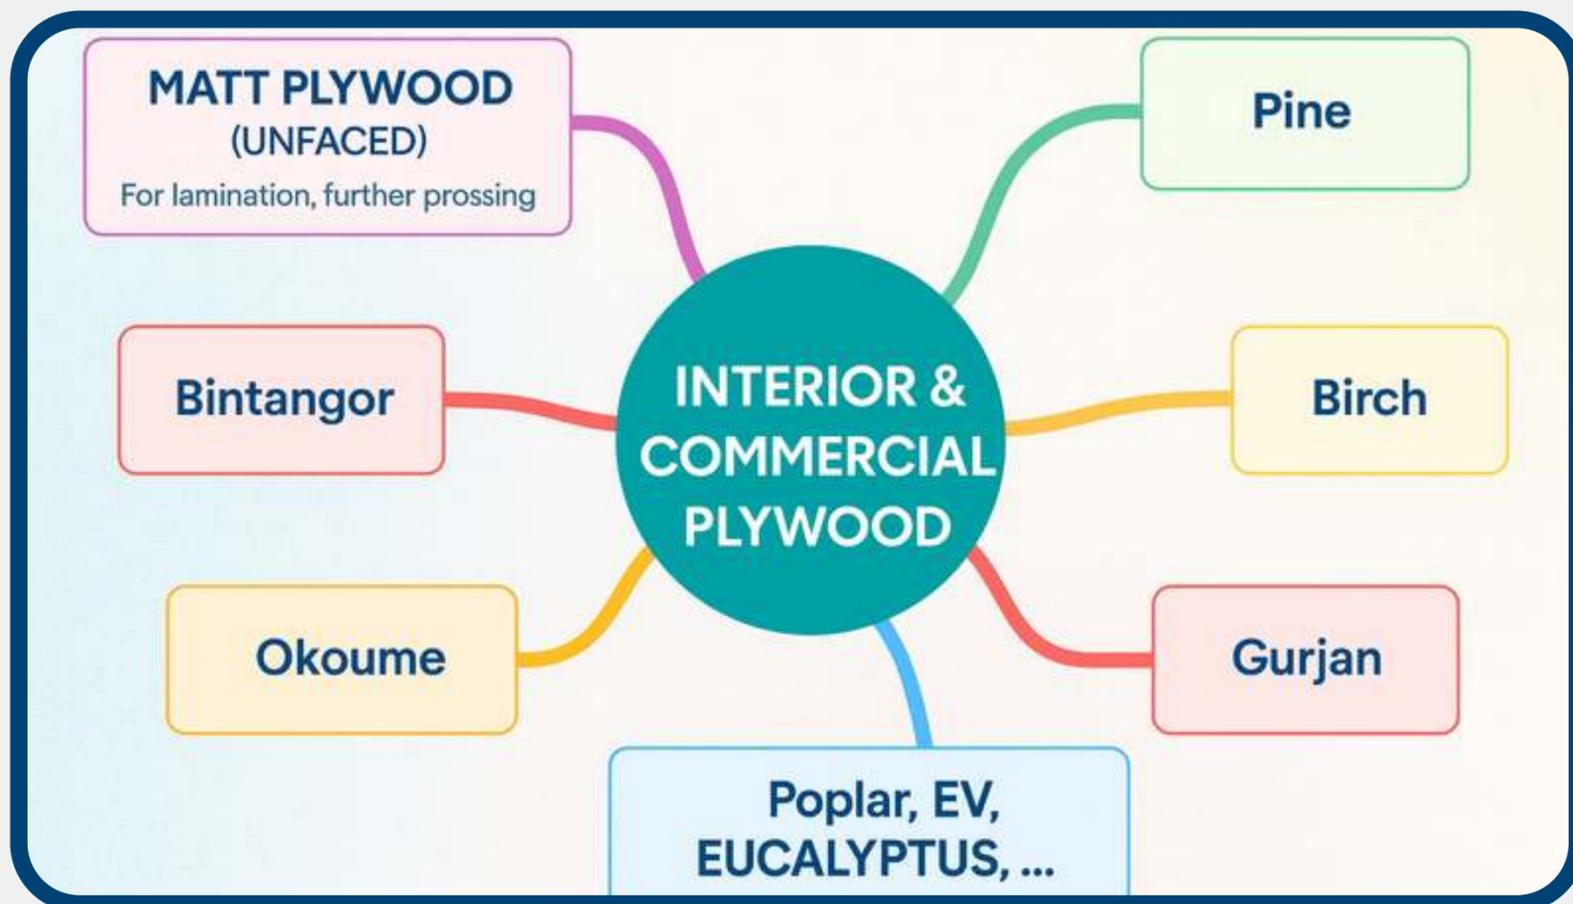

HCPLY CO LTD

# INTERIOR & COMMERCIAL PLY

HCPLY provides a wide selection of Interior & Commercial Plywood, designed for furniture, decoration, and general use. With diverse face options such as Matt Plywood (Unfaced), Bintangor, Okoume, Birch, Pine, Gurjan, Poplar, EV, and Eucalyptus, we deliver panels that are lightweight, durable, and easy to process.

These products are widely used in cabinets, wardrobes, doors, panels, and other interior applications, meeting international standards of quality and reliability.

Matt Ply - International Supplier

We specialize in supplying Matt Ply for the international market, trusted by many large factories.

With multiple raw material quality options, we ensure diverse solutions that meet all customer demands.

# MATT PLYWOOD

**Durable & Strong**

**High Uniformity**

**Water-Resistant Core**

**Health Safe**

HCPLY supplies Birch Plywood with smooth surface, high durability, and elegant light color, making it ideal for furniture, cabinets, and interior applications. With excellent uniformity and water-resistant core, Birch Face Plywood ensures both strength and aesthetic value for premium projects.

# Birch PLYWOOD

# POPLAR PLYWOOD

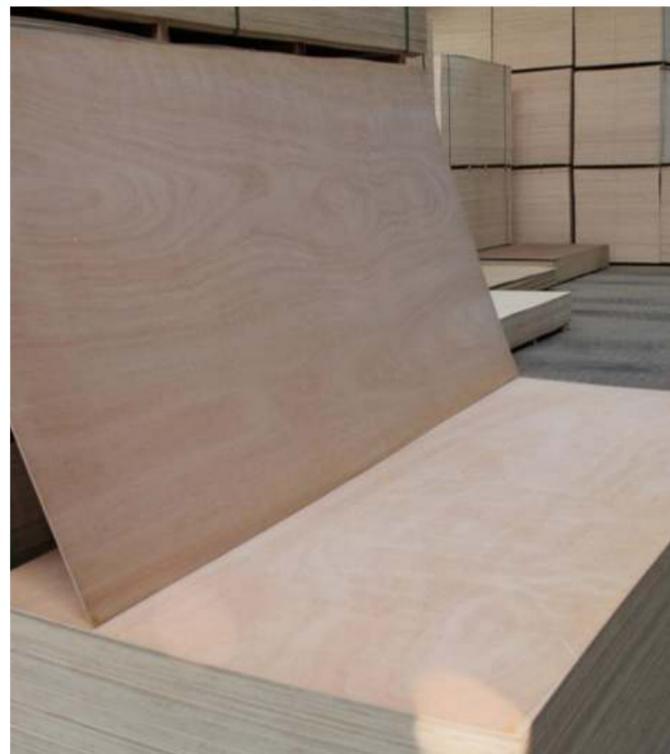

HCPLY provides Poplar Plywood with a light, uniform surface and stable core. Known for being lightweight yet durable, it is widely used in furniture, packing, and interior decoration with excellent cost efficiency.

HCPLY CO LTD

# OKOUME PLYWOOD

HCPLY offers Okoume Plywood with a reddish-brown, smooth veneer surface that is easy to paint, laminate, or finish. Lightweight yet strong, it is highly favored for furniture, doors, panels, and decorative interiors, bringing both beauty and durability to modern projects.

HCPLY CO LTD

# PINE PLYWOOD

HCPLY supplies Pine Plywood with a bright natural grain, combining strength with easy workability. It is widely used for furniture, flooring, shelving, and decorative panels, delivering both durability and a warm natural look.

# Other Face Options

HCPLY supplies a variety of other plywood face options, offering customers more choices to match different markets and applications.

## Bintangor

Economical and practical, Bintangor Face Plywood is widely used for furniture, packaging, and general interior applications. Smooth surface and cost efficiency make it a popular choice in many markets.

## Gurjan

Dense and durable, Gurjan Face Plywood is trusted for heavy-duty furniture, flooring, and construction projects. Its strong structure ensures long-lasting performance.

## Sapele

Sapele Face Plywood offers a rich reddish-brown color and decorative grain, perfect for premium furniture, cabinets, and stylish interior design.

## Eucalyptus

Eucalyptus Face Plywood combines strength with affordability, making it suitable for furniture frames, packing, and multipurpose use.

## EV

EV Face Plywood provides uniform patterns and customizable colors, ideal for modern furniture makers and interior projects seeking consistency and flexibility.

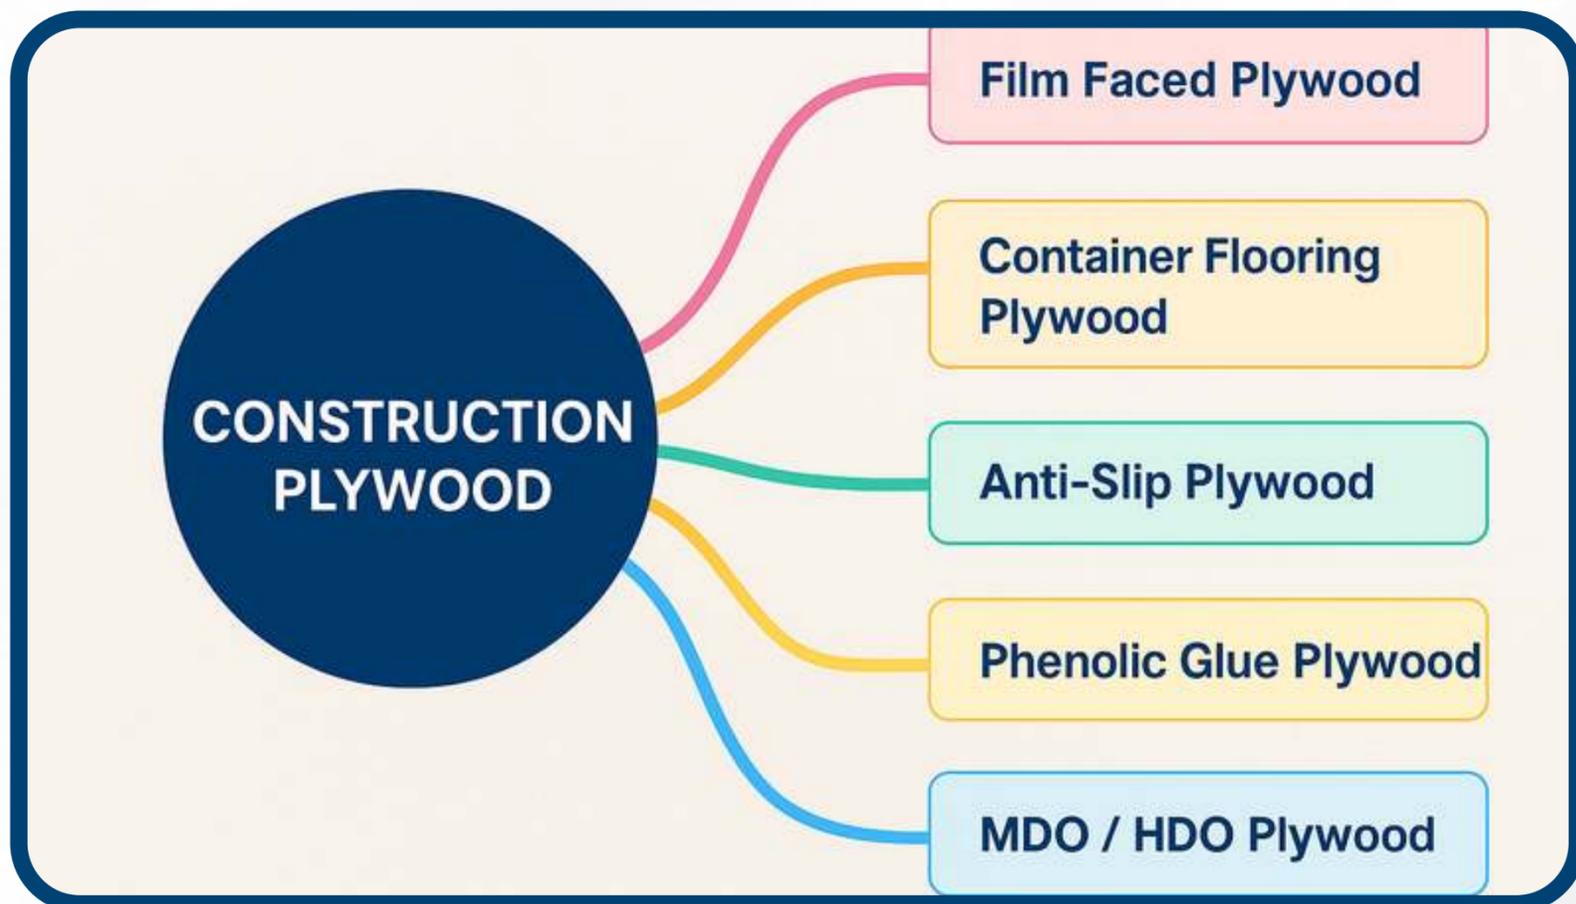

HCPLY CO LTD

# CONSTRUCTION PLYWOOD

HCPLY provides a complete range of Construction Plywood solutions for building, flooring, and industrial projects. With strict quality control and durable performance, our plywood meets international standards of strength, water resistance, and reliability.

Our main product lines include: Film Faced Plywood, Container Flooring Plywood, Anti-Slip Plywood, Phenolic Glue Plywood, and MDO/HDO Plywood.

# CONSTRUCTION PLYWOOD

## TECHNICAL SPECIFICATIONS

### 2. Construction Plywood

- **Filmfaced plywood**
- **Anti-Slip plywood**
- **Container Flooring plywood**
- **Phenolic Plywood**
- **MDO/HDO Plywood**

SPECIFICATION	DETAILS
Face/Back Options	Film Faced, Anti-Slip, Phenolic, ...
Core Options	Eucalyptus, Acacia, Styra, mixed hardwood
Size	1220 × 2440mm, 1250 × 2500mm & other
Thickness	9-12-15-18 & other
Glue	WBP Melamine, Phenolic
Moisture Content	8% - 12%
Density	550 - 700 kg/m <sup>3</sup> (depending on core)
Surface Finish	Smooth, Hexagon, Rice-like, MDO/HDO finish
Formaldehyde Emission	E0/E1/CARB P2 compliant
Reusability	15+ times with Melamine glue, 20+ times with Phenolic glue
Applications	Formwork, scaffolding, truck flooring, container flooring, industrial platforms

HCPLY CO LTD

# Film faced Plywood

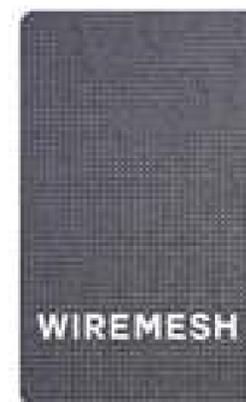

HCPLY Film Faced Plywood is designed for concrete formwork with high strength, smooth surface, and excellent water resistance. The panels can be reused over 15 times with melamine glue and over 20 times with phenolic glue, ensuring cost efficiency and durability for construction projects.

HCPLY CO LTD

# Anti-slip Plywood

WIREMESH

HEXAGON

RICE-LIKE

HCPLY Anti-Slip Plywood is a film faced plywood with a treated surface that provides strong slip resistance, durability, and water resistance. Commonly used for flooring, scaffolding, truck beds, and industrial platforms.

Surface weight: 220g patterned side, 130g smooth side

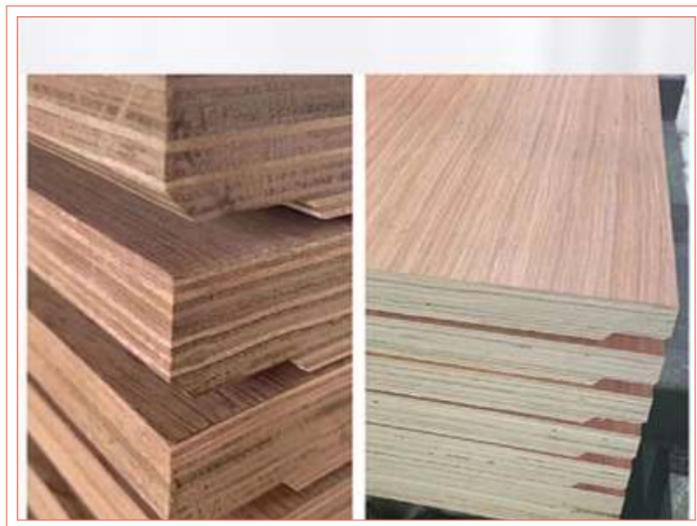

Surface options: Hexagon, Rice-like, Wiremesh

HCPLY CO LTD

# Construction Plywood

To give customers more choices for specific applications, HCPLY offers detailed options within the Construction Plywood category:

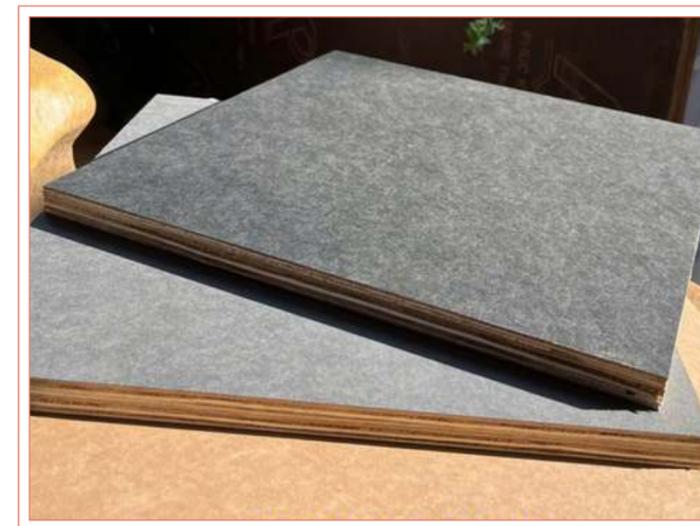

## Container Flooring

Specially engineered plywood designed for container floors. With strong load-bearing capacity and durability, it ensures safety and stability in heavy-duty transport and storage applications.

## Phenol Glue Plywood

Formwork plywood coated with phenolic glue for enhanced water resistance and durability. Cost-effective and suitable for factory construction, basement foundations, column casting, beams, and wall formwork.

## HDO/MDO Plywood

Medium Density Overlay (MDO) and High Density Overlay (HDO) plywood, offering smoother surfaces, excellent weather resistance, and long service life. Ideal for industrial formwork, outdoor panels, and high-end construction projects.

# CHEAP PACKING PLYWOOD

## TECHNICAL SPECIFICATIONS

3.

### Cheap Packing plywood

- Both face Bintangor
- One side Bintangor-one side styrox
- Both side styrox

SPECIFICATION	DETAILS
Face/Back Options	Bintangor, styrox
Core Options	mixed hardwood
Size	1220 × 2440mm, 920 × 1840 mm & other
Thickness	8 / 9 / 12 / 15 mm (common for packing)
Glue	MR, E2, Melamine
Moisture Content	10% - 14% (suitable for packaging & export)
Density	480 - 650 kg/m <sup>3</sup> (depending on core)
Surface Finish	Plain, smooth, or light sanding
Formaldehyde Emission	E2, E1 / CARB P2 compliant
Applications	Packing boxes, pallets, crates, container loading, industrial packaging use

# Cheap Packing plywood

To give customers more choices for specific applications, HCPLY offers detailed options within the Construction Plywood category:

## Both face Bintangor

- Red face plywood, slightly higher in price, suitable for export packing or budget-friendly construction applications.

## One side Bintangor– one side styrax

- More affordable option, balancing cost and performance for packaging and formwork.

## Both side styrax

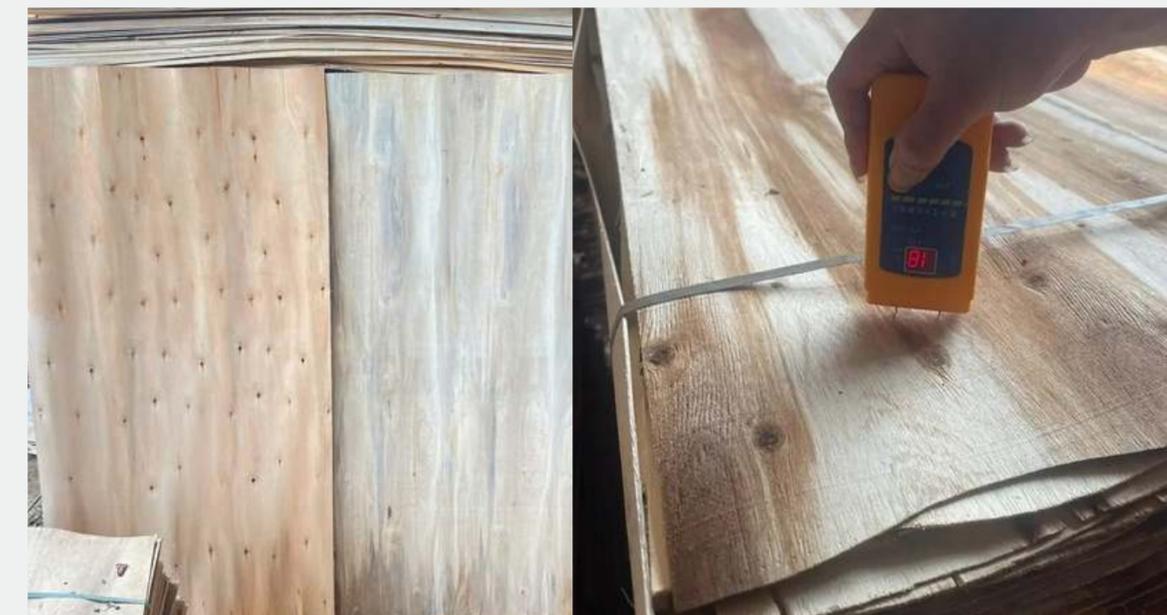

- The lowest-cost solution, ideal for domestic packing, crates, and temporary construction use.

# TECHNICAL SPECIFICATIONS
